No more business on hand, moved by Mr. Larson that Board adjourn.

CARD OF THANKS

I wish to thank all those who helped to remove my stock during the fire Monday morning. Signed: W. N. Frickleton, Druggist

Irma Business Block Destroyed

Causing a loss estimated at \$55,000, the worst fire known at Irma since 1911 destroyed seven buildings in the business section of the town early Monday morning. The fire, broke out about 1:30 a.m. in the sitting and dining rooms of the Irma hotel. Fanned by wind the flames progressed rapidly and by 3:00 a.m. had spread to adjoining buildings while the hotel was still ablaze.

Aided by chemical equipment and many volunteer fire fighters, the town's fire brigade put out a strong fight against the rapidly spreading fire which was given impetus by high wind.

Most of the loss is partially covered by insurance. There was little salvage, the buildings were burned and their contents being practically a total loss except for most of the furniture, all of the wall and part of the drug store equipment. The hotel occupants escaped through the windows, losing their clothing and personal effects.

Chief Losses Suffered
The chief losses incurred are estimated as follows: Irma hotel owned by T. W. Shaw and run by L. Hager, building \$40,000; contents \$3,500; ice cream parlor, building owned by H. W. Love, \$2,000; contents owned by James Pond, \$1,500; drug store building, owned by H. Long, \$2,000 and contents owned by W. N. Frickleton, \$1,000; Alberta government telephone building and Great War Veterans building, \$800; telephone equipment, \$2,500; Irma Pool Hall and larder shop owned by James A. Hedley, with contents, \$6,000; Nu-way store building owned by H. Long, \$3,000; and stock, \$22,000; and post office and fixtures owned by C. Knudson, \$5,000.

Mrs. D. MacDougall and her son who live over the ice cream parlor had a narrow escape from death, barely escaping with their lives from the flames that enveloped the building.

Mail Was Removed
Mail and furniture were removed from the post office with little loss, also some stock from the drug store. Through the preventive efforts of volunteer workers the bank building, several residences, McFarland's general store, the garage and theatre, all of which were in danger from the fire, were saved.

Dr. Cousier, who had his dental office over the Nu-way Store, lost his office furniture and equipment and Ed. Lechell lost his Ford car which was parked at the rear of the store.

Monday morning's fire is the most serious that has occurred in Irma since 1911 when a disastrous blaze wiped out by the telephone exchange. Work of rebuilding commenced on the lots before the fire was hardly cooled. The Calgary Power Co. had a gang of men on the job within a couple of hours after the fire had started and before daylight the damaged wires had been removed and new fuses placed where the others had blown out so that juice was being supplied before daylight. Mr. Machon, of the Alberta Government, Telephone department was on the job about four A.M. and had the long distance lines run to P. E. Jones office so that communication with outside points was being effected. A new building is being erected for the telephone exchange and a new switchboard will be installed by the end of the week. J. M. Hedley has moved a building on his former site and is in Edmonton securing the necessary equipment to resume his barber trade. We understand that Mr. Hedley is contemplating putting up a new building which will accommodate his own business, the Post Office and probably the Nu-way Store. The mail and Post Office equipment was moved in the building owned by Mr. Masson, next to his office and Mrs. Knudson was handing out mail at the usual time Monday morning. Mr. W. A. Gamble, of the local Bank staff saved the bank building by clinging to a ladder and keeping the side of the building soaked from the hose from the chemical equipment. Also Carl Soniff and his section gang saved the fire from going west by forming a bucket brigade and keeping the Hipperson Garage safe.

Practically every house in the North West section of town was endangered and was saved only by having someone on the roof with wet sacks to brush off the burning embers as they lit.

Adjusters were in town nearly all week adjusting the insurance and we understand that most of the policyholders are well pleased with the adjustments made, although some of the losses were only partly covered.

Important Notice to Ratepayers of M. D. of Kinsella No. 424

Notice to All Ratepayers of M.D. 424
In accordance with the request made by the majority of the ratepayers at the annual meeting the Council sent a deputation to meet the members of the Viking Hospital Board. The Hospital Board were asked if they would accept the Southern half of the M. D., that is, Divisions 1, 2 and 3 into the Hospital area, the answer was that there was not enough accommodation at the Hospital at the present time, but if they were assured that the three divisions would come in, they would have a vote to raise

the money to enlarge the Hospital and be very pleased to take the three Divisions into the area.

It is the intention of the Council to have a vote taken sometime during the summer to find out if the three divisions wish to be included and the Council wish the matter to be thoroughly discussed and advertised, and if there are ratepayers who have other ideas or comments to make on the scheme they are invited to forward them to the Secretary and they will be taken up and discussed at the next Council meeting.

PRAIRIE FIRE WARNING

**WARNING
PRAIRIE & FOREST FIRES**
In those sections where an unusual fire hazard exists due to lack of moisture in the soil it is important that every person should comply with the requirements of the Prairie Fires Act and the restrictions as to obtaining permits before starting any fire in a fire district. Where it is necessary to burn stubble, weeds, straw stacks, brush piles, meadows, or any other matter, whether in a Fire District or not, the Prairie Fires Act requires that the material that is to be destroyed by burning, shall be surrounded with a fire guard not less than ten feet in width consisting of land covered with snow or water, or being so worn, graded, ploughed, burned over or covered with water as to be free from inflammable matter, and such fire shall be guarded by at least three persons provided with the proper appliances for extinguishing such fire. After the seventh day of May the fire guard shall not be less than 20 feet in width. Fires burning in the ground shall be extinguished or so guarded as to prevent any possibility of escape.

Dated at Edmonton, in the Province of Alberta, this 10th day of March, 1931.
Benj. Lawton, Chief Fire Inspector

TENDERS WANTED

Tenders wanted for the building of a cement building, 75 x 80, one story. Plan at J. A. Hedley, Irma, Alta.
Tenders close April 30th, 1931.

CARD OF THANKS

A New Order Prevails

In the business and financial section of one of the most conservative (spelled with a small "c") papers in Canada we find the following paragraphs:

"That our present economic scheme is seriously at fault surely no reasonable person will deny. The existence of hunger and want in the midst of plenty—the fact that the existence of this abundance of supplies is itself responsible, at least in part, for our present condition, surely constitutes uncontrovertible evidence of our economic unsoundness."

"Argue as we may as to the respective responsibilities for the current depression of the various immediately contributory factors such as over-production and under-consumption of commodities, shortage of gold, hoarding of gold, demonetization of silver, tariffs, war debt, etc., the fact remains that our present economic system doesn't work. It functions increasingly poorly even in 'good' times; its breakdown is immediate and shocking when bad times recur."

"The fact that Big Business, our industrial magnates and captains of finance, as well as the workers, now recognize this fact, perhaps, the most hopeful sign of all. There was a time when everybody everywhere accepted 'bad times' as inevitable sooner or later. But not now. The world is at last coming to a realization of the truth that many of our economic ills are largely man-made, and, therefore, capable of both prevention and cure by man-made methods. Cure and prevention will not be brought about by any one magic formula, nor can it be accomplished overnight. The process of developing solutions may be slow and painful. We will probably have to discard many pre-conceived ideas, and accept policies formerly rejected as impracticable and utopian."

For example, there is a growing acceptance of the fact that the old idea of nationalism as opposed to internationalism must give way. The Great War has taught all nations at least one lesson, namely, that no one nation can live unto itself alone; that, on the contrary, each nation is dependent on other nations whether they like it or not. Recognition of this fact led to the creation of the League of Nations to direct the world's thought in relation to matters of peace and war. Deliberations of the League Assembly soon revealed that the issue of peace or war was not confined to the solution of racial problems, or the adjustment of boundary disputes, or the realization of designs by one nation on another for purposes of gain and glory. The weaknesses of peace, or the outbreak of war, was found to depend, in many cases, on the integrity of a people, upon the social conditions under which they lived, upon their sharp contrasts of wealth on the one hand and grinding poverty on the other, upon their ability to sell and buy what their necessities demanded they should buy. Hence the League of Nations today is scientifically studying every conceivable subject in relation to the welfare of all nations and races.

This lesson was not learned at once, and immediately following the Great War, nations everywhere adopted policies with a view to making themselves self-contained. Where one adopted policies to that end, others followed. Instead of recognizing and profiting by the lesson taught by the war, they ignored it and went to extremes. That is one of the outstanding reasons for and causes of the present world depression and stagnation in business. A man conceivably can live and eke out an existence on his own farm, refusing to have any relations whatever, business or otherwise, with his neighbors, but he will deny himself all the enjoyments, refinements, and many of what we now regard as the necessities of life. Never will he become prosperous. And so it is with nations.

As Miss Agnes McPhail, M.P., told the recent Teachers' Convention in Saskatchewan, the world is facing an entirely new order. Instead of confining our thought and our policies to an extreme nationalism, we must become internationally minded. She declared that most people were internationally illiterate, and were not conversant with conditions existing in the world and with the trend of the times, whereby the day of the self-contained and independent nation has given place to a new era of inter-dependence of nations. And because we have not realized how completely the world is inter-dependent, we are still trying to solve our problems with yesterday's methods. They won't work because the world has moved to a new condition; the old is gone forever.

We must take that lesson to heart, and govern ourselves accordingly. We cannot be prosperous if other nations are not. Their prosperity is absolutely essential to our own well-being.

Find Centuries Old Trees

Discovery Is Made Of Ancient Buried Trees In Quebec

Quite recently some white birch trees which had been buried for centuries were discovered in the vicinity of the village of Riviere St. Jean, Quebec, by a field officer of the Topographical Survey, Department of the Interior. The remarkable thing about

these trees was their state of preservation. Specimens were presented to the Forest Products Laboratories, Department of the Interior, at Ottawa, whose officers state that preservation was due to a surplus of water and a deficiency of air conditions inhibiting the growth of wood-decaying fungi.

Better Fertilizers

Demand For Fertilizers Containing Highest Percentage Of Plant Food

The Dominion Seed Branch reports that the volume of fertilizer sold in Canada increased from a total of 50,000 tons in 1924, to about 225,000 tons in 1929. Increased tonnage, however, is not the whole story. The average analysis of mixed fertilizer sold in 1924 showed about 14 per cent. total plant food as compared with about 30 per cent. in 1930, so that the actual plant food sold in mixed fertilizers in 1930 was at least eight times that of 1924. The trend seems to be toward higher analysis fertilizer containing less filler and more plant food at lower cost to the farmer. The trend in demand, also, is for the fertilizer containing the higher percentage of plant foods.

CORNS
Lift off - No Pain!
QUICK RELIEF

Just a drop or two of Putnam's on any sore corn and out comes all the pain. The corn shrivels up and drops off. No scar, no pain, no pinching from tight shoes. You can dance or walk in comfort. Use only Putnam's Corn Extractor. Satisfaction guaranteed. Sold by druggists everywhere.

PUTNAM'S

Good News For Aviators

Device To Keep Ice Off Wings Of 'Plane Is A Success

Victory was reported at Akron, O., over one of the aviator's most dangerous enemies—ice that forms on the wings of his aeroplane and sometimes causes it to be wrecked.

Through low-hanging clouds, at freezing temperature and an altitude of 2,000 to 3,000 feet, Charles Meyers, of Cleveland, piloted his aeroplane, which was equipped with rubber "overshoes."

The overshoes—pouches of a specially treated rubber fabric fitted over the leading edges of the plane and wings and struts—were made to "breathe" as the ice formed on them. As they breathed the ice crumbled away.

The inflation and deflation, which worked like a man's lungs, were created by a motor-driven air pump in the cockpit.

SAVED IMPORTED DRESS

"After a little wearing, a lovely green voile—an important dress—lost color so completely that it was not wearable. A friend who had admired it asked me why I wasn't wearing it any more. On hearing the reason, she advised dyeing it and recommended Diamond Dyes. To make a long story short, it turned out beautifully. I have a lovely new dress that really cost just 15c—the price of one package of Diamond Dyes."

"I have since used Diamond Dyes for both tinting and dyeing. They do either equally well. I am not an expert dyer but I never have a failure with Diamond Dyes. They seem to be made so they always go on smoothly and evenly. They never streak or run; and friends never know the things I dye with Diamond Dyes are things I dye with Diamond Dyes."

Mrs. R. F. Quebec.

Reciprocal Trade

Would Refrain From Advertising Dominion Products In Britain

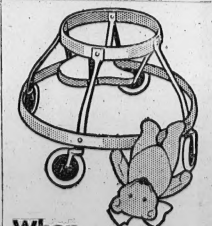

Rt. Hon. J. H. Thomas, secretary for Dominion Affairs, was asked by a questioner in the British House of Commons to consider the advisability of refraining from further advertising Dominion products on Empire Marketing Board handbills in Britain, "until a scheme is evolved whereby similar advertising of British goods can be shown in the Dominion."

The minister replied in the negative. "The questioner is asking me to agree to something that would be a violation of the bargain we have made with the Dominions. I am endeavoring to ask them to reciprocate in other ways, but to say that unless you do it we refuse to give you the effect of our part in the bargain, is rather odd."

As a verminicide an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

All-Glass House In Japan

An all-glass house that is asserted to exclude air, dirt and bacteria, has been built by a scientist in Japan, ventilation being provided by air pumped from a distant point through filters.

When BABIES are Upset

BABY ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea. How would you meet this emergency—tonight? Have you a bottle of Castoria ready?

For the protection of your wee one—for your own peace of mind—keep this reliable preparation always on hand. But don't keep it just for emergencies; let it be an ever-ready aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria.

Fletcher's CASTORIA

W. N. U. 1852

Ontario Cancer Commission

Treatment Of Cancer By Radium Will Be Subject Of Inquiry

The treatment of cancer by radium will be the subject of an enquiry by a royal commission, Hon. Dr. J. M. Robb, Minister of Health, announced in the Ontario legislature. The announcement led to an unqualified condemnation of the use of radium by the former minister of health, Hon. Dr. Forbes Godfrey, Dr. Robb's desk-mate in the House.

It was a case not only of doctors disagreeing, but of ministers of health and Conservative front-benchers disagreeing and the incident created a distinct sensation in the House. For-gotten rumors to the effect that Dr. Godfrey had left the Ontario cabinet partly because of a disagreement with former Premier Ferguson on the question of radium were recalled.

"Cancer is a public health problem," said Dr. Robb. "It can be checked if it is caught in time. Early treatment is the great secret and if we are going to use radium we have to concentrate on that. Those who have studied the question in this province feel we should have more radium."

"I have the authority of the prime minister to say that a royal commission will be appointed to look into the matter and when the commission makes its report some definite policy will be announced on the matter." Whether the government should step in and purchase a quantity of radium for treatment of cancer patients in Ontario was something which would be decided when the commission brought in its findings.

"I am sorry to have to disagree with the minister, but I must do so most emphatically," said Dr. Godfrey. "Cancer is hereditary. Treatments by surgery, X-ray and radium have all proved dismal failures. I am entirely opposed to the use of radium. I am ever so unfortunate as to be in a cancerous I would die of cancer in preference to death from radium."

Wonderful For Indigestion!

When your stomach feels bad; when you feel bloated and indigestion pains make you feel miserable—a single dose of pure, reliable, pleasant and effective **MILBURN'S HEART NERVE PILLS** will bring almost instant relief.

SELECTED RECIPES

FLORADORA PIE

- 2 cups pineapple diced.
- 3 tablespoons diced.
- 3 tablespoons Benson's Corn Starch.
- 1 cup coconut
- ¼ cup sugar.
- 4 egg yolks.
- Juice and rind of 1 lemon.
- 1 teaspoon salt.

Blend the sugar with the corn starch and add to the malted butter. Stir in the other ingredients and cook until thick in a double boiler. Put in a baked crust and cover with meringue.

Homesteading Limited

Areas In Alberta and Age Of Homesteader Specified

Alberta will permit homestead entry in certain specified areas but restrict this to persons of the full age of 17 years, British subjects or with the intention of becoming British subjects, who have resided in the province for a period of at least three years.

Regulations to this effect were approved by the Provincial House before the House prorogued, when the new Alberta Lands Act was finally passed.

Miller's Worm Powders destroy worms without any inconvenience to the child and so effectively that they pass from the body unperceived. They thoroughly cleanse the stomach and bowels and leave them in a condition not favorable to worms, and there will be no revival of the pests.

The Boston Post Road, originally an Indian trail between New York and New England, was outlined by the first official post rider in 1673.

The leaning tower of Pisa was never upright because the foundation began to sink before the construction was completed.

ENOS FRUIT SALT

Doctors Warn Against Drastic Purgatives

Physicians know the danger of using cheap cathartics that create a harsh, unnatural intestinal activity. They know that ENOS "Fruit Salt" is more than a laxative. It is a delicious health beverage that sweetens and tones up the entire system—and that its daily use—just a dash in a glass of water, every morning—is an aid to vigorous good health.

An Unfamiliar Country

Few Canadians Know Very Much About Argentina

Canada stretches across the north half of North America. Argentina occupies the greater part of the southern extremity or "tail" of South America. Argentina's length from north to south is approximately two-thirds of Canada's from east to west. Its population is perhaps a million greater than Canada's. Its largest city, Buenos Aires, is three times the size of Toronto, and with its 2,225,000 inhabitants, ranks as the world's eighth. They are (in millions of population): London, 7.4; New York, 6.9; Berlin, 4.0; Chicago, 3.3; Paris, 2.8; Osaka, 2.4; Tokyo, 2.2; Buenos Aires, 2.2. Argentina has four other cities larger than Hamilton, Ont., ranging in population from 460,000 down to 170,000, whose names (Rosario, Cordoba, Avellaneda, and La Plata), are quite unfamiliar to the average Canadian reader. But the opening of the British Trade Exposition in Buenos Aires, and the visit of the Prince of Wales to Argentina, has drawn all eyes to that far and unfamiliar country.—Toronto Star.

The average height of an Englishman is 5 feet 9 inches, of a Frenchman 5 feet 4 inches, and of a Belgian 5 feet 6½ inches.

Need For Adjustment Of Weights Of Hogs Marketed To Conform To Requirements

Time and experience are great teachers—but only for intelligent people. The official grades for hogs have been established a considerable length of time and production and marketing under the system have now been carried on during wide variations in conditions both as affecting production and the manufacture and distribution of the product.

For years conditions in production were such that producers were all the time inclined to put their hogs on the market in a somewhat unfinished condition. The results were, too big a percentage of light hogs and many otherwise good hogs within the prescribed weights yielding thin bellies. As the belly makes the valuable breakfast bacon this weakness in the product was important.

In a system of grading hogs alive the determination of whether a belly was finished or not was exceedingly difficult. However, comparisons of live gradings with dressed tests revealed the fact that most of the thin bellies came from the lighter hogs within the bacon grades. Therefore, to secure the proper quality in the high grade product, it was agreed to raise the minimum weights of the bacon grades ten pounds.

But producers were anxious to maintain the spread between the minimum and maximum weights of the grades and it was at the same time agreed that the maximum weights should also be raised ten pounds. Packers always recognized that the inclusion of these heavier weights within the better grades of hogs was dangerous, because demand for hams, backs or breakfast bacon for the domestic market or of Wiltshire side bacon for the export market of the weights that hogs from 220 to 230 lbs. yielded was very limited at the best prices. However, as the numbers of hogs of these weights were not at the time in such great supply as to constitute a burden, the producers' requests were acceded to. And as long as these conditions prevailed no harm was done.

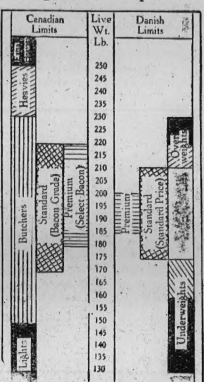

This year we have run into producing conditions which have proved that in the effort to correct the former condition the proper limit of weights was over-reached. An excess of weighty hogs in all of the three main grades has seriously affected the sale of the product and has been a very depressing factor in the market. It is also very dangerous from the standpoint of our prospective entry into the export market.

There is, therefore, a need for an adjustment of the weights of the bacon and select bacon grades to 180 to 220 lbs. at the farm or fed and watered, and of the butcher grade to 150 to 230 lbs., and when and if conditions should in the course of some years again make desirable a slight swing of 10 pounds in the weights it would appear reasonable that arrangements should be made so that this could be done expeditiously. But producers plead that there should be stability in the weights for each grade. Insistence on absolute stability will not work to the advantage of the producer or of the industry as a whole, but if this view is to prevail then undoubtedly the weights will require to be moved back to those that will, on the average, give the desired product, and be left there. The weights from 180 to 220 lbs. at the farm, or fed and watered, yield the Wiltshire cuts from 55 to 65 lbs. that are in demand and the weights of hams, bellies, backs and loins that are most desired by the domestic consuming trade. Then, when feeding conditions change and there is again a tendency for considerable percentages of unfinished hogs to come to market, these will have to be excluded from

the higher grades by rigid grading of the lower weights for quality.

In connection with standards of weights the accompanying chart showing a comparison of ours with the Danish standards is very illuminating. The Danish standards, it will be noticed, are very much narrower than ours. Their standard grade on a live basis weighs from 175 to 210 lbs., and their premium hog only from 185 to 200 lbs. The Dages discount all hogs under 175 lbs. and over 210 lbs. These weights are calculated from dressed weights at the factory and would be for reasonably empty hogs. They would correspond more nearly to our weighed off car weights, which are ten pounds lighter than our farm or fed and watered weights.

Hog Grades Compared

The chart compares the weight limits of the official grades of hogs in Canada and Denmark. It will be noticed that the grade equivalent to our "Select Bacon" for which the Dages pay a premium has a spread of only 15 pounds—from 185 to 200 lbs. against our 40 lbs. The Danish standard grade, equivalent to our bacon grade, has a spread of only 35 lbs. against our 50 lbs. There is no grade in the Danish system equivalent to the butcher, but over-weights and underweights start directly from the standard with, in each case, a discount in price. The Danish grades do not provide any place for hogs under 130 lbs. or over 230 lbs.

Fruits Are Preserved By Quick Freezing

And British Columbia Is Experimenting With Green Peas
Some interesting observation with respect to the application of "quick freezing processes" to perishable fruit and vegetables is contained in a recent news letter of the Dominion Cold Storage Branch. Tests recently made with peaches show that the process preserves all the original nutritive values and mineral salts with no evidence of loss of valuable chemical constituents or flavor. The process seems to keep the fruit absolutely fresh, in fact, 40 out of 42 "tasting tests" reported the "frozen" peaches more juicy, sweeter and of better flavor than that of "fresh" peaches.

In British Columbia, experiments are being made in the "rapid freezing" of green peas in small cartons. These peas will be held in storage at a temperature of 35 degrees Fahrenheit below zero until marketed next winter.

United States' Largest Cities

In 1920, the United States had 68 cities with a population over 100,000; the latest census gives 93; and these 93 contain more than one-fourth of the total population. New York City heads the list with its 6,958,792. The 10 largest cities are New York, Chicago, Philadelphia, Detroit, Los Angeles, Cleveland, St. Louis, Baltimore, Boston, Pittsburgh.

Canadian Copper Ore

Copper ores of various kinds, including the native metal, are found at many places throughout Canada, but only sulphide ores are commercially important.

The world's earliest farmers lived in the New Stone Age about 10,000 years ago.

The speed of light never changes, experiments indicate.

Western Indians Are Raising More Stock

Industry Has Developed Rapidly In Last Few Years

The stock-raising and farming of the Indians of the western provinces has developed rapidly in the last few years, says W. M. Graham, Indian commissioner.

"Thirty-five bulls were purchased at Regina and 11 at Brandon, he stated, and a large number were bought at the Calgary Fair.

"These bulls are paid for from a fund created by the Indians themselves," he said. "Each Indian pays so much into the fund every time he disposes of an animal from his herd. It is well known that the Indians have some of the finest cattle in the Western provinces and have taken prizes at many shows held at different places.

"They own more than 20,000 head and dispose of between 3,000 and 4,000 head every year. The estimated calf crop this year is expected to be between 6,000 and 7,000 head."

BETTY BARCLAY'S HELPFUL HINTS

TODAY BETTY SAYS:

There's a bumper crop of small and medium sized oranges out west this season and prices are pleasingly low. The economical housewife buys large quantities of these sizes in place of her usual order for one or two dozen large oranges. With these in stock, she can prepare dozens of tasty fruit cups, salads and desserts—and of course see to it that each member of the family secures his or her morning fruit juice.

Purchasing in quantity means a real saving with many foods, particularly with those that will keep for some time. Study your markets and you can save considerably.

Waterloo Peace Prize

Sir Eric Drummond Is Awarded Prize For 1931

Sir Eric Drummond, secretary-general of the League of Nations, announced his acceptance of the Waterloo Peace Prize for 1931, awarded by the Carnegie Foundation.

Sir Eric asked the directors to present the accompanying money award of approximately \$12,500 to some institution furthering the ideals of the league. Thereupon it was awarded to the International Federation of Nations Associations at Brussels.

Nearly \$30,000,000 has been expended by the city of Oslo, Norway, in recent years, in municipal housing construction.

LOST ON NAUTILUS' FIRST SEA VOYAGE

Willard Grimmer, quartermaster aboard the "Nautilus" submarine in which Sir Hubert Wilkins heads an expedition under the north polar ice, who fell overboard from the undersized craft and was drowned at the entrance to New York Harbor, upon the submarine's first sea voyage. He is shown above pointing out interesting features of the "Nautilus" to his young wife just prior to the craft's sailing for Camden, N.J.

CHINESE MURDER MISSIONARY

Mrs. Victoria Miller of Glendale, Calif., who was one of two women missionaries reported murdered at Yamanfu, China, while they slept, by hatchet blows believed delivered by discharged servants.

Market In The Orient

Sees Solution Of Economic Problem In Trade With Asia

Asia was the unexploited part of the earth toward which industry should now bend all its efforts for marketing, R. J. Cromie, publisher of the Vancouver Sun, declared before the Advertising Club of Montreal, recently. Bankers of the world should find a way of re-establishing silver at some fixed level of value or giving Asiatic people currency that would be good for world commerce in order to facilitate their buying, the speaker declared.

"A sick world economically is no different from a sick industry or a sick financial institution, and there is little difference in the treatment required, except that to cure successfully 'depressed' world conditions it is necessary to think in an international way. You and I as an individual are helpless to restore the buying power of silver countries like China and India, which will in turn restore the buying power of Europe, and set in motion the huge surpluses that are piled up all over the United States and Canada. And the world's business depression will not be lifted until we start these surpluses moving," Mr. Cromie said.

Spruce and Balsam Cones

The cones of the spruce hang down from the branches; those of the balsam fir (or "balsam") stand upright. The species are thus easily distinguished when the trees are bearing cones, states the Dominion Forest Service of the Department of the Interior. The two species mentioned are the ones chiefly used in the manufacture of wood-pulp.

A New Life-Saver

Among the new life saving apparatus to aid people at sea is a specially designed balsam wood float which is provided with a hole through its centre, permitting the float to be slipped over the barrel of an ordinary shotgun using a blank cartridge. The float can be projected accurately to a drowning person 150 feet distant.

The human body is 60 per cent. water.

Splendid Services Of The Community Doctor In West Noted By American Investigator

Demand For Better Beef

Well Finished Young Cattle Means Money To The Producer

The beef grading service of the Dominion Department of Agriculture, which is closely in touch with consumer preference for beef, recently stated: "One thing clearly apparent in the market at the present time is the demand for better beef." The market preference today, the Department adds, is for well finished young cattle weighing around 900 to 950 lb. live weight, dressing out around 525 lb. This type of animal, properly finished, means money to all concerned."

Skill Of Modern Surgery

Young Man Born Blind Recovers, His Sight

The skill of modern surgery has brought the wonders of sight to Earl Musselman, 20-year-old student at the Pennsylvania Institute for the blind.

Born without pupils in his eyes he had never seen the light until recently, when, weeks after a delicate operation had been performed, the bandages were removed from his eyes. He could see, after a life of darkness.

(By Annette)

A LIGHTWEIGHT WOOLLEN SPORTS FROCK

It is adorably smart in black and white supple woollen showing striking contrast in yellow silk crepe vest. It achieves a slenderizing silhouette through clever use of diagonal lines.

The cross-over bodice with side closing conceals breadth through the waistline and hips.

The neckline is especially becoming. The supple vestee lends a smart softness to the bodice. Style No. 926 is easily copied. The saving will amaze you. It comes in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

Navy blue flat crepe with white crepe vestee is youthfully smart and wearable.

Printed flat crepe silk is also suitable for this model. Make the vest of plain blending crepe.

Size 38 requires 3½ yards of 39-inch material with ¼ yard of 35-inch contrasting. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

The community doctor serves 32 rural communities in Saskatchewan on a full time or part time basis, according to a report made by Dr. C. Rufus Rorem to the committee on costs of medical care, at Washington, a private organization which is making a five-year survey of the financial end of medicine. These Saskatchewan country doctors as well as three physicians employed for their full time by three municipalities in Manitoba, are paid out of public funds.

Dr. Rorem in his report says: "Saskatchewan has for some years taken the lead in the Dominion of Canada in the matter of sanitation, immunization against contagious diseases, and other preventive measures and has recently inaugurated a system by which all residents of the province requiring hospitalization for tuberculosis may receive both institutional and medical care at no direct cost to themselves."

Municipal doctors, Dr. Rorem found, were usually hired when communities found their existing medical services were inadequate or too costly, or when physicians had been previously served them died or moved away.

Dr. Rorem said the average salary of the full-time physicians in Saskatchewan is \$4,000 and to this many physicians were able to add considerable sums through fees which they were allowed to charge.

"In a general way," he said, "physicians appear to consider their net incomes are larger under the municipal doctor system than in private practice in the same localities."

No rural municipality which had adopted the municipal doctor system has gone back to the private practice basis.

Preference For Canadian Wheat

Britain May Make Offer Of Coal In Exchange For Wheat From Dominion

Quota preference for Canadian wheat in the British market in exchange for a Canadian market for British anthracite coal will be one of the proposals advanced by the British Government at the Imperial Conference to be held in Ottawa during the summer, according to an editorial forecast in the London Daily Express.

"Well done, Socialists," comments the editorial, in reference to the presumably reliable report that the Labor Government intends to give the British farmer a quota on his wheat. Under the proposed scheme the use of at least 15 per cent. British flour in all bread would be made compulsory. But, the newspaper anticipates the government will not stop there.

"They have every intention," it says, "of going to the Imperial Conference at Ottawa this year, determined not to repeat last year's fiasco. Canada too will be offered a wheat quota. The price asked will be a Canadian market for British anthracite coal."

Canadian Cheese, Milk and Ice-Cream

The consumption of cheese, milk and ice-cream is increasing in Canada. In 1921 the average used per head of population was 253 pounds of cheese; 240.1 pounds of milk; and 5.26 pints of ice-cream. In the following seven years this increased to a per capita consumption of 3.54 pounds of cheese; 470.8 pounds of milk; and 7.05 pints of ice-cream.

First Woman Pilot

The first female aeronaut was one Madam Tibe or Thibie. She joined the painter Fleurant aboard a balloon, called the Gustave, which ascended at Lyons, France, on June 4, 1784, in the presence of the royal family of France and the King of Sweden.

Shorthorn Club Elect Officers

(From The Viking News)

There were 35 in attendance at the first annual meeting of the Northern Alberta Shorthorn club at the Arena, Tuesday night, and much interest was shown by breeders. Angus McDonnell, of Inas, presided.

Officers elected: Honorary President, Professor George Day of Guelph; president, Angus McDonnell; vice-president, W. H. Wallace, Viking; executive, James Sutherland, E. A. Meyer, G. R. Ball and J. Johnson.

Plans for the year include two field days, one at the university about June 1st and the other at Vermilion Agricultural School, where the provincial government have a Shorthorn herd, possibly after the Edmonton fair in July.

Professor Day, who is secretary and executive official of the Dominion Shorthorn association, gave a talk on the breed, finance of the dominion body and raising and fitting stock. He deplored the dangerous propaganda, again recurrent, by which use of dairy bulls with beef or general purpose herds was advocated, and said results were an absolute detriment to agriculture.

Anyone in the Viking district wishing any information in regard to the Shorthorn breed of cattle may apply to Mr. Wallace.

Mr. Wallace has also received a letter from the Live Stock Branch in regard to the Pure Breed Bull Purchase Policy which in part reads as follows:

"In answer to your inquiry regarding the Pure Breed Bull Purchase Policy, we have to advise you that the Government advance 75 per cent of the purchase price of a bull, the purchaser to pay 25 per cent, plus 3 per cent to cover expenses. When the application is received in the Department and approved of, arrangements will be made to purchase a bull for the applicant. The remittance of 25 per cent and the 3 per cent to cover expenses must be made with the application. A lien note is taken for the 75 per cent which has to be repaid within a period of three years, bearing 7 per cent."

We presume that this means any breed of bull purchaser may wish. However, further information and application blanks may be had by writing the Live Stock Commissioner, Edmonton, Alta.

LOCAL CREAMERY SHIPS THREE CARLOADS OF BUTTER TO VANCOUVER (From The Viking News)

Since the first of the year the Viking Co-operative creamery has shipped three carloads of butter to Vancouver, the third carload being shipped out this week. The creamery has had a better run than ever during the winter months, and has established itself more than ever as the leading industry in this district. Cream is being received from as far east as Winter, Sask., and all intervening points, and from as far west as Holden, including all points east of Holden. The local creamery thru its co-operative method of giving the highest possible price during the year (which most of the time exceeds the market price) divides its profits with the patrons and shareholders at the end of the year, with a bonus cheque for each pound of butter fat delivered to the creamery.

WARNING

Owing to the exceptionally dry winter and lack of moisture in the soil there is at present every indication that there will be a serious fire hazard this coming spring. It is, therefore, important that every person with authority to enforce the Prairie Fires Act shall use every effort with in reason to discourage the setting of fires, and the every person whether a Fire Guard or not will be sufficiently interested to extinguish or assist in extinguishing fire which may be burning and not under proper control.

There are many fires burning in the field and it is important that these should be extinguished or so guarded that they will not escape.

In Fire Districts, no fire is to be kindled for the burning of stubble, straw stacks, brush piles or rubbish of any kind without first obtaining a permit from a Fire Guardian or a Justice of the Peace or from the Alberta Provincial Police. Permit of application and permits can be obtained from this Department by those who are authorized to issue the same.

Dated at Edmonton, in the Province of Alberta, this 10th day of March, 1931.

BENJ. LAWTON,
Chief Fire Inspector

Heard among the fellows at the dance: "That Strome girl is easy on the eyes." "I'll say she is. One look is enough."

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

A Good Advertising Medium and a Reliable Newspaper on Oil Activities

EDITORIAL FROM THE WEYBURN (SASK.) REVIEW

For some years the railways in Canada, the United States and Great Britain have been faced with a lessening in revenue from passenger traffic on short hauls, gradually increasing loss as the number of motorists grows, due to the automobile, not only in the hands of the private owner, but in the hands of those who, for charges closely approximating those of the railways, carry in busses passengers from point to point. This, and the service offered by bus lines is meant particularly, is apparently a situation which cannot be bettered from the point of view of the railroad as the service, stopping at closely located points to pick up or drop off passengers, is one with which the steam roads would find it impossible to compete, and it is unquestionably more pleasant, in warm weather at any rate to skim along the highways through the choicest farm lands and enter the cities upon boulevard streets thru the residential districts than it is to travel in a passenger coach on rails through what is, in the older sections of the country at least, usually a less pleasing part of the countryside and enter the cities through crowded railway yards with one's view of the bleak walls of factories or warehouses obscured by smoke and soot.

While this situation is serious from the standpoint of the railways it is by no means the most serious phase of the competition growing through the use of large vans and freight trucks upon the highways for the transportation of loads of freight, large or small, between points already well served by the railways. This competition, if it is allowed to grow unchecked, will result in serious losses to the transportation companies with resultant drastic cuts in service at no direct benefit to the people of the country who transfer their freight shipments from the steel rails and rolling stock of the railways to the rubber-tired, gasoline-driven, freight vans of private individuals and the highways built, maintained and paid for by the taxpayers of the various provinces. It may be said of course, that the public is entitled to competition from other forms of transportation such as busses, trucks, etc., but, insofar as can be seen, the railroads of the country will provide the backbone of transportation for many years, such competition as that given by freight trucks driven over public highways, with a comparatively small investment in rolling stock and no charge or at best a small charge (license fee, etc.) for the use of the public highways, can scarcely be described as fair by even the most pronounced railway critic.

ASSOCIATION DOING GOOD

FIRE PREVENTION WORK

That Canadian Commerce has already enough "in the red" without adding any forest fires in 1931, is the keynote of a nation wide educational campaign just inaugurated by the Canadian Forestry Association.

Field lecturers are already at work in British Columbia, the Prairie Provinces, and Nova Scotia, and will shortly enter other provinces to enlist the Canadian public in a determined forest protection effort. Fifteen educational parties in all will be utilized, each with a motor truck, motion pictures and electric generators to meet the condition of 1100 remote communities. Where roads are not available, aeroplanes and boats are used to reach mining and other districts where forest fires commonly have their origin.

The Association, which belongs to no government or commercial body, has had many years of practical success in organizing public sentiment in the frontier country and has built up a membership of 32,000, the largest of any similar Association in the world.

In the southern Prairie Provinces, where shelter belt planting is of the highest economic importance, and is virtually the key to mixed farming, the Association's railway lecture car is now covering Saskatchewan with packed daily audiences far exceeding the attendance of prosperous times. During the afternoon and evening, crowds of settlers and their families are instructed in tree planting, and many hundreds of new shelter belts are a direct consequence of such educational methods.

Drudgery

is an Extravagance

FOR five hours today this woman patiently toiled over a washboard . . . bending, lifting, rubbing . . . doing the things a tireless little Electric Washer can do in two hours. Day after day, she dusts, sweeps, cleans . . . doing things a vacuum cleaner would do twice as fast with half the effort.

With Electricity ever at hand such drudgery is an extravagant waste of time and effort. Hours that now drag slowly by might be enjoyed in doing the things she'd rather do. The woman who wishes golden hours of freedom must first break the shackles of housework. Electricity is ready to help.

The Calgary Power Company representative in your territory can procure for you any item of electrical equipment. He will tell you about the attractive terms upon which you can purchase many electrical appliances—with a small cash payment and the balance on your monthly light bills.

WORLD HAPPENINGS
BRIEFLY TOLD

Air mail can now be sent from London to Jamaica, by way of Miami to Kingston, in 11 to 12 days.

No serious obstacle will be raised by the Alberta government in connection with a proposed \$100,000,000 power scheme to use waste gas.

Hon. Herbert Marler, Canadian minister to Japan, will arrive in Vancouver on May 14, with wife, for Ottawa May 16.

The International Hydro-Generator Patents Company Limited, a worldwide organization, has been formed to develop fuel oil from coal.

A silver porringer, which was worth approximately \$90 when Samuel Pepys, the famous diarist, used it, was auctioned for approximately \$7,500.

More than 8,000 workmen of the naval dockyards and arsenals were discharged as a consequence of restriction of activities under the London naval treaty.

Five nations—Canada, the United States, Russia, Argentina and Australia—hold the power to remedy agrarian economic ills, Louis Fischer says in his new book, "Why Recognize Russia?"

A Baghdad despatch to the newspaper "Times of India" said that thousands of tribesmen and their cattle are dying of thirst and starvation in the worst drought in the history of the southern Irak Desert.

Admiral Richard E. Byrd, the first man to fly over the North and South Poles, states that he is planning another aeroplanes expedition "into the polar regions" in the next few months. He would not reveal whether he would fly to the Arctic or Antarctic regions.

Dream May Be Realized
Dr. Hugo Eckener, Zepplin commander, bade America goodbye seeing realization of his dream of scheduled trans-Atlantic airship flights by 1933. In ten years, Dr. Eckener believes, two sailings a week in either direction will be made.

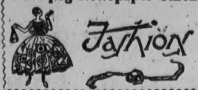

HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets as millions of people know. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry the pocket tin of Aspirin tablets with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

DEMURE LITTLE MISS APPEARS IN PRINT

Today's bolero model is youthful in style and coloring. It's fascinating in soft yellow and blue challis-like woolen, so lovely for Springtime without a topcoat. The collar, of course, like all the French models, is of white pique. It is hemstitched professionally, separating the scalloped to give a petal-like effect.

And to add to its attractiveness, it is accompanied by matching bloomers with knee bands.

Style No. 200 is designed for girls of 6, 8, 12 and 14 years. Crepe de chine prints, tweed-like cottons, wool creps, wool jersey, rayon novelties and linen are also perfect mediums for this adorable dress.

It is easily fashioned! The small expenditure will surprise you!

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Recipes For This Week

(By Betty Earclay)

SUGAR COOKIES

2½ cups special flour, sifted.
2 teaspoons baking powder.
½ teaspoon nutmeg.
½ cup butter or other shortening.
1 cup sugar.
2 eggs, well beaten.
Creamed cold 1 lemon.
1 tablespoon cream.

Sift flour once, measure, add baking powder and nutmeg, and sift together twice. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add eggs, lemon rind, and cream, and beat well. Add flour, a small amount at a time. Beat after each addition until smooth. Roll into thin sheet on slightly floured board. Cut with floured cookie cutter and dredge with sugar. Bake in hot oven (425 degrees Fahrenheit) about 7 minutes. Makes 2½ dozen cookies.

CELERY SAUCE

Cook ½ cup chopped celery in 1½ cups salted boiling water 20 minutes. Drain, reserving both liquid and celery. Melt 1½ tablespoons butter, add 1½ tablespoons flour, and when smooth add the reserved celery liquid with enough more water to make 1 cup. Stir and boil 1 minute. Add the celery, bring to boiling point, season to taste with paprika and more salt, if necessary, and keep over hot water until ready to serve. Just before serving, add 1 egg yolk and ½ cup cream, stir and cook 2 minutes.

"Women," said little Harold, "are always doing something to break a feller's heart."

"Yes," said little Jerry, "my sister's beau just started giving me small change every Sunday, and then she married him."

Canadian Radio League

Support For Proposal To Form Two Railway Broadcasting Systems

Declaring that the British Broadcasting Corporation was established to give the British Government control of a war propaganda machine, and strongly opposing a national broadcasting system, J. Murray Gibson, of the C.P.R., Montreal, has announced in an article published in the Canadian Forum of Toronto, support of the proposal to form two railway broadcasting systems. Mr. Gibson is general publicity agent of the C.P.R., under whom C.P.R. broadcasting is administered.

Mr. Gibson endorses the proposal of H. W. Ashcroft, of the Goddard and Works Station, Toronto, that the C.P.R. and C.N.R. each have a system. "It is the most practical proposal so far suggested," he states. The private system would carry advertising and would not require a government subsidy. The public system, he proposes, would carry educational programmes and it is his opinion that it would only interest ten per cent. of the listeners. Mr. Gibson is convinced that it would certainly need a subsidy at the expense of the tax-payers.

There is a superfluity of small private stations, says Mr. Gibson, and he advocates a re-allocation of wavelengths between the two railway networks. "The small stations split up wave-lengths and have permitted offensive direct advertising, but 'to eliminate advertising from the air would deprive more than half the population of what they want, to provide intellectual solace for a few,' he stated.

According to published B.B.C. programmes, Mr. Gibson says advertising is broadcast in Britain and the contention of the Canadian Radio League that no advertising is carried is not borne out. The increase in the number of British listeners he says, is not due entirely to the popularity of B.B.C. programmes, but to the knowledge that an up-to-date set provides reception for continental programmes.

Mr. Gibson examines the financing of broadcasting in North America, and says that Canadians get \$20,000,000 worth of entertainment from American stations, and \$2,000,000 worth from Canadian. A generous estimate of the cost of talent in North America, he says, that would be required for programmes equivalent to those of the B.B.C. would be \$2,000,000. "It is because the half million Canadian radio fans have access to \$20,000,000 of entertainment that the Canadian radio business has been fairly prosperous in a period of general financial depression."

Synthetic Air

Better Than Natural Air, According To Scientists

Science believes it can give mankind synthetic air to breathe that is better than the natural atmosphere, the American Chemical Society was told.

Professor J. W. Hershey, McPherson College, McPherson, Kas., said experiments have shown that life can be sustained more healthfully with a chemically concocted atmosphere, which can be manufactured and introduced in office buildings, airplanes and submarines, than with the nitrogen-oxygen that surrounds the world.

Experiments with white mice showed that in some cases they lived more healthfully in helium-oxygen than in nitrogen-oxygen, Professor Hershey said.

A strangely mottled discolorization which attacks otherwise healthy teeth of children in certain parts of the country, notably Texas, is due to the chemical element fluorine, according to R. V. Churchill, who described his investigations before the convention. The fluorine discolorization, which apparently does not cause tooth decay but is located under the enamel, comes from the fluorine element sometimes present in drinking water, Churchill said.

South Africa's record gold production in 1930 is continuing this year.

Japan is launching several irrigation projects.

Granny Rides a Motorcycle

Sixty-Year-Old English Woman Is Quite An Enthusiast

In the face of the displeasure of her grandchildren, Mrs. Clara Brown, aged 60, recently rode from Leamington to London on her motorcycle to attend the annual dinner of the London Ladies' Motor Club, in honor of Sir Malcolm and Lady Campbell and other racing drivers. She rode in overalls and waders, with her dinner gown strapped on the handle bars. Three years ago Mrs. Brown took part in a six-day motor trial and recently won a Concours d'Elegance, wearing a riding outfit which she made herself.

Apples In Egypt

Canadian Apples Are Being Well Received In The Cairo Market

The market for Canadian products, particularly apples, is ever widening. Recent reports indicate that a potential market of considerable interest to Canadian growers is available in Egypt. Canadian apples are being well received in the Cairo market, selling at around \$4.83½ per box. They have not only won recognition as the best apples coming onto the Egyptian Market, but apparently they can be laid down there at a price which makes them more attractive than other fancy pack importations from the United States—Dominion Department of Agriculture.

On Threshold Of Discovery

Dr. John Anderson, formerly of the London school of tropical medicine, died at Shanghai, China, after an operation, just when he believed himself to be on the threshold of a crowning achievement in his research into cerebro spinal meningitis. It is understood he succeeded a short time before in isolating the meningitis germ.

Regular air service between Europe and Australia is being considered.

The Coming Census

American Paper Comments On the
Growth Of Canada

Canada is sharpening her pencil to take a census. Like the United States, the Dominion counts its children every ten years, but does it one year after we do, says the Cleveland Plaindealer.

This census means much to Canada, for it is expected to put the Dominion over the 10,000,000 mark. If it should fail to do so there will be much gnashing of teeth and demands for recounts just as some states and cities on our side of the border were doing last year. An official estimate as of last June 30, placed the population at 9,934,500, but there was some fear that this figure might be a trifle optimistic. In 1921 the population was 8,788,482.

Two or three years ago some Canadians were annoyed because of their slow rate of growth. Especially were they disturbed that immigration from Great Britain was averaging only a half or a third of what it had been before the war. Also the 100,000 new citizens a year the Dominion was getting from the United States in the boom days of the Canadian northwest had dwindled to 25,000 or 30,000. There was likewise protest because so many young Canadians were going to the United States where wages were higher and automobiles cheaper.

Then the depression came and the slower growth seemed much less of a disadvantage. Canada has apparently kept its percentage of unemployment considerably under the United States figure, although this belief cannot be proved until the new census is complete.

One wishes Canada joy in her census, with the friendly hope that it will prove everything she hopes it will.

Religious Relic Found

A silver cup, believed by some scientists to be the one used by Jesus and His disciples at the last supper—the Holy Grail of the legends of King Arthur—will soon be sent to Paris as part of an exhibition of Christian Art. It was found in 1910 by archaeologists in Syria.

One Swedish lumber company has cut timber from a forest tract for almost three centuries, and by reforestation has kept the tract in approximately its original state.

Finland has nearly 23,000 automobiles.

When You OVER- INDULGE

EVERY man, woman and child will occasionally over-indulge. But don't suffer for your indiscretions. It's folly to do so when you can so easily sweeten and settle a sour, upset stomach with a little Phillips' Milk of Magnesia.

Hearty eaters have long since learned the quick comfort this perfect anti-acid brings. Smokers know how it neutralizes nicotine; brings back a sweet taste; guards the breath. Women know what it does for nausea—or sick headache. And when children have over-eaten—or are bilious, constipated or otherwise upset—give them a little of

same, pleasant-tasting and milky-white Phillips' Milk of Magnesia.

You'll be through with crude methods once you learn the perfect way. Nothing else has the same quick, gentle effect. Doctors prescribe it for indigestion, nausea, heartburn, gas, sour stomach and headache. It has been standard with them for over 50 years.

Insist on genuine Phillips' Milk of Magnesia; a less perfect product may not act the same. The genuine is always a liquid—never in tablet form—and the name Phillips is always on bottle and wrapper.

(Made in Canada)

Electric Devices For Wilkin's Submarine

Explorer States the "Nautilus" is
Being Elaborately Equipped

The "Nautilus," a submarine which is being prepared to travel across the top of the earth and beneath the North Pole, is being elaborately equipped with electric devices, it has been announced by Sir Hubert Wilkins, explorer. Together with other special apparatus of unique design and purpose, these electric appliances make the submarine a more perfect dwelling place for the crew of twenty than even Jules Verne's famous "Nautilus," whose name this modern craft will bear in memory of the great scientific fictionist.

Paradoxically perhaps, but none the less truly, Sir Hubert's "Nautilus" will carry an electric refrigerator into the Arctic Ocean. The interior of the submarine will be warm enough, even in the frigid zone, to cause food to spoil; the electric refrigerator will be used for the preservation of the food rations of the crew.

The "Nautilus" now being equipped at Philadelphia, will also have a complement of electric sun lamps, since the boat will be under water so much of the time that, even though the sun shines 24 hours a day in the "Land of the Midnight Sun," the men will gain very little exposure to natural sunlight. The crew will need the ultra-violet rays of the artificial sun to keep them in good physical condition.

Underground Heat

Proposals To Tap the Interior Heat
Of the Earth For Use On the
Surface

Among the schemes that interested the late Sir Charles Parsons, inventor of the steam turbine engine, was the tapping of the interior heat of the earth for economic use on the surface. At one time he suggested forming an international corporation to finance the digging of a hole twelve miles deep into the earth's rind to determine whether the results obtained would justify the expense of opening up subterranean heating plants generally. He was never able to persuade capitalists to advance the money, though surely there should be one among the many multi-millionaires who would undertake the project, if only for the immortality he might acquire if the work worked. We know that it does work in volcanic countries, where kindly nature has already opened chimneys into the central fire-box. The observatory buildings on the slopes of Mt. Etna are now steam-heated from the craters, and the houses are easily regulated as in any contrivance of man. In the geysers region of New Zealand the flow from the hot springs is controlled and piped, and the family washing and a man's shaving are done in water fresh from cavernous measureless taps where the steaming Sisyphus lapped the Phleboton shore. Boston Transcript.

Travelled On Dimes

Unique Method Used To Finance
Round the World Trip

Oscar S. Bodenhausen started back to his home in St. Joseph, Mo. recently, after seeing the world on dimes. Twenty-seven years ago he decided to save every dime he found in his pockets at the close of each day. Last August, having amassed \$3,700, he took a de luxe train for San Francisco. There he embarked on a tour that took him to all the places he had been dreaming of—Japan, Korea, Manchuria, China, the Philippines, Burma, India, Ceylon, Italy, Paris and London.

He landed in New York with \$350. It becomes the nucleus of a new travel fund.

Vicar Had Last Word

The vicar was worried because the young women of the parish were "setting their caps" at the handsome young curate.

"I know," he said to the young man "that you have given them no encouragement, but such a state of affairs is unseemly. I am reluctantly compelled to ask you to offer your services elsewhere."

"But surely, sir, there is safety in numbers."

"There is," replied the vicar, "but there is even greater safety in exodus."

It has been estimated that 20,000,000 meteorites enter the earth's atmosphere from outer space every day.

A wife is anybody who can look in the top drawer of a dresser and find a man's handkerchief that isn't there.

W. N. U. 1885

DEPRESSION

"I'm a different woman"

"Two years ago I began to get depressed, and everything was too much trouble for me. I was a misery to myself and everyone else. I was advised to take Glaxo Tablets by my friends who said it was the same as when I was a child. I was in good luck, so at last my husband got me a bottle of Glaxo and no one would realize the different woman I am. I have been taking Glaxo now constantly for two years. My daughter also would not be without it. I have got my neighbour to take Glaxo as well and she has found its worth as she feels a different woman."

(Mrs. G. A. K.)

The commonest cause of depression is partial constipation—an insidious complaint because the sufferer is seldom aware of it. It means the gradual accumulation of body poisons which dull the mind, damp the spirit, sap the nervous strength and lower the vitality.

Glaxo Tablets make constipation impossible. Therefore, if you keep to Glaxo you need never know the meaning of melancholy; never feel "nervy" or depressed.

Britain Amazes the World

Manufacturers Showed Many Novel-
ties At British Industries Fair

In the first two days 17,515 British buyers visited the Olympia and White City sections of the British Industries Fair. Last year the number was 12,305. The buyers from overseas in addition numbered 604, as against 457 last year.

If you had been at Olympia, Kensington, W., mingling with the crowds of buyers who had come to London from all parts of the world for the opening of the Fair, you would have heard one exclamation rising above all other sounds of amazement and surprise. It was:

"Leipzig beaten at last!"

Germans were the first to say it. Frenchmen quickly followed suit. Traders from Denmark and Sweden, Holland and Belgium gave the same judgment. All Europe was agreed on it.

As for those who represented the United States, Argentina, and other countries of the New World, they unhesitatingly admitted that they had never seen such a colossal collection of new ideas and first-class goods as the world's showplace of factories and farms of one nation.

The Dominions and the Colonies were very largely represented, and the first large order was placed by a representative of a South African bank on a consignment of typewriters.

There is no end to the list of novelties which British manufacturers are offering to the world at the Fair. Here are some of them:

Penny-in-slot machines which deliver one coin and safety razor blades. Pipes specially designed for smokers with false teeth.

Teapots in which tea can be stirred by twirling the knob on the lid.

Wrist-watching straps made from the hair of elephants' tail.

Women's handbags fitted with telescopic umbrellas.

Women buyers from all over Europe and the United States were at the Fair in exceptionally large numbers.

Your Home Medicine Chest.—Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Electric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Electric Oil for relieving rheumatic and sciatic pains, treating colds, throat and chest, coughs, burns, scalds, cuts, bruises and sprains.

Unlawful Assemblies

Bill Designed To Correct Certain
Abuses Is Before Parliament

A bill designed to correct certain abuses in connection with "unlawful assemblies" received its first reading in the House of Commons. J. S. Woodsworth (Labor, Winnipeg North Centre), who sponsored the bill, explained that its purpose was to meet a safeguarding clause in the criminal code in order to ensure that the general nature and character of speeches on public affairs should be the ground for regarding any meeting as unlawful.

"In some of our cities recently, there has been what seem to me to be an abuse of the law whereby citizens have been pre-judged with regard to their utterances, while others who may have been listening have been declared to be members of an unlawful assembly," Mr. Woodsworth said. "This has been done without regard to the general character of the speeches made. The bill is merely to prevent that sort of thing in the future."

"Dr. Blank has a new car."

"I know it! I helped to pay for it."

The ADVENTURES OF CAPTAIN JIMMU and his Dog SCOTTIE

We had slipped down the burning slope, reaching every minute to the top, then found ourselves falling into space. We shut our eyes, rather than see the merely burning forest, but we believed by below—then suddenly I found myself choking for breath, deep down in the cool swirling depths of a mountain pool.

I fought my way to the top and found Scottie swimming in circles up there on the surface, looking for me with a most painful expression on his whiskered face. Above us the woods burned brightly, and down stream the river disappeared in a smoke-filled tunnel of flaming trees. If we were through that tunnel we must go on if we were ever to get out. The air felt alive with heat and the light was of uncertain color. I had no idea whether the sun was shining or not.

When the water grew shallow I waded around, slippery beneath my feet, over ledges where the swift, white current rushed furiously. He wriggled his body and often swept me off my feet. It was painful, but I was anchored. I was not alone. I was clutched under my coat and I staggered along as fast as I could.

Soon the stream narrowed, and the rock ledges on either side rose to a height of twenty feet or more. It was a regular gorge. Up over us the woods were burning furiously, but above the crackle and roar of the flames rose another sound—a sort of deep bass rumble like thunder that broke through a long very far ahead!

The current grew deeper and swifter, and the gorge continued to grow steeper and narrower. I clung to a ledge for support while I rested. Scottie, my boy, it's certainly lucky you know how to swim. He wriggled his body and often swept me off my feet. It was painful, but I was anchored. I was not alone. I was clutched under my coat and I staggered along as fast as I could.

"Leipzig beaten at last!"

Germans were the first to say it. Frenchmen quickly followed suit. Traders from Denmark and Sweden, Holland and Belgium gave the same judgment. All Europe was agreed on it.

As for those who represented the United States, Argentina, and other countries of the New World, they unhesitatingly admitted that they had never seen such a colossal collection of new ideas and first-class goods as the world's showplace of factories and farms of one nation.

The Dominions and the Colonies were very largely represented, and the first large order was placed by a representative of a South African bank on a consignment of typewriters.

There is no end to the list of novelties which British manufacturers are offering to the world at the Fair. Here are some of them:

Penny-in-slot machines which deliver one coin and safety razor blades. Pipes specially designed for smokers with false teeth.

Teapots in which tea can be stirred by twirling the knob on the lid.

Wrist-watching straps made from the hair of elephants' tail.

Women's handbags fitted with telescopic umbrellas.

Women buyers from all over Europe and the United States were at the Fair in exceptionally large numbers.

Your Home Medicine Chest.—Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Electric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Electric Oil for relieving rheumatic and sciatic pains, treating colds, throat and chest, coughs, burns, scalds, cuts, bruises and sprains.

Unlawful Assemblies

Bill Designed To Correct Certain
Abuses Is Before Parliament

A bill designed to correct certain abuses in connection with "unlawful assemblies" received its first reading in the House of Commons. J. S. Woodsworth (Labor, Winnipeg North Centre), who sponsored the bill, explained that its purpose was to meet a safeguarding clause in the criminal code in order to ensure that the general nature and character of speeches on public affairs should be the ground for regarding any meeting as unlawful.

"In some of our cities recently, there has been what seem to me to be an abuse of the law whereby citizens have been pre-judged with regard to their utterances, while others who may have been listening have been declared to be members of an unlawful assembly," Mr. Woodsworth said. "This has been done without regard to the general character of the speeches made. The bill is merely to prevent that sort of thing in the future."

"Dr. Blank has a new car."

"I know it! I helped to pay for it."

"I planned, flying low. By the sound, it was good old Vickers, but I was so quick I couldn't see anything of it. I yelled at the top of my lungs and Scottie barked—but we mist as well have been whistling in a hurricane in Greenland. Why, we could not even hear ourselves.

Slowly, step by step, we retraced our way back through the gorge. On a flat rock in the stream we sat down to think. The look was too cool for comfort and the rock was none too cool. Taking off my leather jacket, I carefully pushed the other into place against the opposite wall of the gorge. Then I looked for Scottie.

From my shirt I made a sling. With one end of it I fastened the rope to the wall of the gorge, then I stepped out and I braced myself against the tree and lowered myself down. The rope just reached the log, took a tight hold of the leather strap and slipped over it. The force of the fall was tremendous. The rope slipped through my fingers and I spun dizzily around, and with a thump I landed in the shallow water at the edge of the gorge. I climbed wearily out and there was Scottie watching me on the bank.

The stream widened as we went along, and the walls of the gorge dropped to the level of the banks. We were only a foot or two above stream.

The woods seemed to be getting lighter ahead. I pushed on faster—and there we were on the edge of the forest. The mountain lake you ever saw. Far up to the right, the fire was rapidly working down to the lake. To our left, the woods were burning almost to the water's edge. We were hemmed in again.

All sudden there was a scrambling in the underbrush—some heavy animal scratching its claws. A bear came out, a grizzly bear and stood still with every hair standing on end. It was a grizzly bear. The crashing grew nearer. . . . (To Be Continued.)

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. . . . Pound and half pound tins at your grocers

New Radio Process Tested

Uses Only Enough Power To Operate
Flashlight Bulb

A new radio process which uses just enough power to light a flash-light bulb, threw voices across the English Channel when it was demonstrated by the International Telephone and Telegraph Company. The device, which is now being tested, operates on a wave-length of eighteen centimetres.

The aerials are less than one inch long. Conversation was clear and distinct. The process used a radio beam travelling in a straight line.

The Terror Of Asthma comes like a thief in the night with its dreadful throttling, robbing its victim of breath. It seems beyond the power of human aid to relieve until one tries the method of Dr. J. D. Kellogg's Asthma Remedy. The relief comes with a rush. Life becomes worth living, and, if the remedy be used persistently, the disease is put permanently to rout. Take no substitute.

Anesthetic Substitute

Drugs producing hypnotic sleep as a substitute for anesthetics in operations were described to the American Chemical Society recently. The chemists were informed of more than 1,000 successful operations already performed in this sleep. The hypnosis is still quite limited, but there is hope of a sleep deep enough for any kind of operation.

Safeguarding the Horse

Farmer's Wife (to 'druggist):—"Now be sure and write on them bottles which is for the horse and which is for my husband. I don't want nothing to happen to that horse before the spring plowin'."

Little Helps For This Week

"Speak unto the children of Israel, that they go forward."—Exodus xiv. 15.

Therefore think not the Past is wise alone. For yesterday knows nothing of the East. And thou shalt love it only as the nest.

Whence glory-whined things to heaven have flown.—James Russell Lowell.

Let us have done with vain regrets and longings for the days that will never be again. Our work lies in front, not behind us; and "forward" is our motto. Let us not sit with folded hands gazing upon the past as if it were the building; it is but the foundation. Let us not waste heart and life thinking of what might have been, and forgetting the "may be" that lies before us.—Jerome K. Jerome.

"I suppose if I were to die tomorrow you'd marry some other woman immediately."

"Not right away, I'd take a rest first."

Hon. J. Adelard Godbout

THE youngest member of the government of the Province of Quebec, Hon. J. Adelard Godbout holds the important portfolio of Minister of Agriculture. He is also chairman of the Quebec Committee of the World's Grain Exhibition and Conference.

Born at St. Eloi, in 1892, Mr. Godbout obtained B.A. and B.S.A. degrees from the Laval University and took graduate work in animal husbandry at the Massachusetts College in 1918 to 1920.

From 1922 to 1925 he was county agriculturist for L'Islet County and was appointed professor of animal husbandry at the agricultural school of Ste. Anne de la Pocatiere in 1918.

In 1929 Mr. Godbout was elected to the Legislature of Quebec for the L'Islet seat. He is a member of the Canadian Society of Technical Agriculturalists.

Main Street

Don't forget the Mothers Day tea in the Church on May 9th.

Miss Bernice Mathison was a visitor in Edmonton last week.

Mr. Hedley and father, motored to the city the first of the week.

Mrs. Geeson has been spending a few days in the city visiting friends and relatives.

We are sorry to hear that Mr. Skiles is unable to be at the store owing to a bad cold.

Mr. and Mrs. S. Johnson and young son and Mrs. Maguire motored to Edmonton the first of the week.

Mr. and Mrs. Watts, of Wainwright have been visiting with Mr. and Mrs. J. C. McLean.

Mr. N. D. McMillan, of Bremner, Alberta, spent the week end with his brother Mack at Irma.

Mr. and Mrs. Martin Eager and daughter Joy motored to Edmonton for a few days last week end.

Born to Mr. and Mrs. August Weinrich, Thursday, April 16th, a daughter.

Mr. Geo. Hodgkins has gone to spend the summer with his sister Mrs. Jas. Woods, in the Crescent Heights district.

The next meeting of the Irma W. A. will be held at the home of Mrs. J. P. Yeend, on Tuesday, April 28th, at 2.30 p.m.

At the Mothers Day tea and sale in the Church on May 9th you will be able to get slips started for house plants, also cut flowers.

Mr. and Mrs. H. E. Jones and infant daughter arrived home last Saturday after a pleasant trip to the Coast.

Mr. G. J. Tripson, one of the largest honey producers in California has been in Irma this week looking over the honey prospects in this part of Alberta.

Mr. W. A. Gamble, teller at the local bank is spending his vacation at his home at Delbourne, Alberta. Mr. G. W. Kenney, of Wainwright is relieving during Mr. Gamble's absence.

Mr. John Hubman and his uncle Mr. Godfrey Hubman of Biggar, Saskatchewan, was in Irma the first of the week to attend the funeral of Mrs. Hubman.

What might have been a serious accident happened at Irma a week ago Saturday when Mr. and Mrs. Fenton were driving slowly north on Main Street, a number of boys ran across the street between cars parked on the east side of the street. Robert Giltner ran into the front of the car just as Mr. Fenton stopped and escaped with a bad scare. Had the car been travelling fast or the brakes been defective the boy would no doubt have been run over.

While attending a concert at the Crescent Hill School on Monday night April 13th, Mr. L. S. Fitzpatrick had the misfortune to lose his house with all of their furniture and clothing, excepting what the parents and children had on them at the time. The fire was discovered by some of the party at the school, but before the house could be reached by the crowd it was too far gone to attempt to save anything. Among the contents lost was a violin over one hundred years old, which was valued at over \$1,000. The house which was only built a short time ago was valued at \$2,000, and was partly insured.

See P. J. Hardy for your auto license. Price on all cars has been reduced \$5.00. Better get your license before the police get you.

Now is the time to arrange to start with bees for 1931. Booking orders for Italian bees for May delivery. Ten frame hives with old combs and lots of bees \$15.00. Eight frame hives \$13.00.—H. W. Love, Irma.

MRS. JOHN HUBMAN PASSES

After a lingering illness Mrs. John Hubman passed away in one of the Edmonton hospitals Saturday, April 18th. The body was shipped to Irma Tuesday and interment took place from the Irma Catholic Church, Rev. Father Doyle of Wainwright officiating. The Church was packed with sorrowing friends and relatives of the deceased who met to pay their last respects to a good neighbor and friend. The deceased who was in her 61st year, leaves her husband, three daughters and two sons, Mrs. Mary Kennedy of Irma, Mrs. Amelia Elford, of Vancouver, and Miss Heida of Irma; John of Biggar and Willie at home; a sister, Mrs. S. Eicker and Mrs. Wm. Neuer of Dodgeville, Wisconsin; also six brothers, John of Switzerland, Godfrey of Biggar, Albert of Minnesota, Emil of Irma, Babist of California and Jacob in Oregon. The following pallbearers carried the remains to their last resting place, Mr. C. Savoy, H. Kennedy, Keith Price, Jas. Donoghue, Jas. Young, and C. Cummings. The casket was covered with beautiful floral tributes from sorrowing relatives and friends.

WOMEN'S INSTITUTE.

The May meeting will be held at Mrs. Percy Jones residence on Thursday 4th. Roll call; A verse on Mothers' Day. Paper: "Women Builders of the West," by Mrs. E. Rae. Will all the members or other ladies in the community bring any thing they can towards making quilts for an emergency case, or any articles they can spare in clothing to fit ages from a year old to twenty. We will be glad to receive anything at all to help out and will those who cannot be at the meeting leave the articles with Mrs. Percy Jones, or Mr. Masson's office.

Don't forget your papers on "Immigration" ladies! Each member to put down her View on Immigration, Assorted, versus Voluntary Immigration. The constituency convener will greatly appreciate your views in assisting her for the Convention to be held here around August.

Hostesses: Mrs. McFarland and Mrs. B. Long.
